SUMMARY

Full Stack Developer with a strong focus on Frontend development, skilled in both front-end and back-end technologies, creating frontend and backend applications.

SKILLS

Programming Languages	C, C++, JavaScript, Python
Frontend Technologies	HTML5, CSS3, Bootstrap, React.js, Tailwind, Redux, Material UI
Backend Technologies	Node.js, Express.js
Database	Mongo DB, Firebase, SQL, Pinecone
Python Libraries	NumPy, Pandas, Matplotlib
AI	LangChain, LangGraph, Open AI API Integration, Gemini AI API Integration, RAG
Version Control System	Git, GitHub, Vercel, Render

EXPERIENCE

HCLTech – Scholar Trainee — June 2025 - Dec 2025

- Trained in Python programming with libraries such as NumPy, Pandas, and Matplotlib for data analysis and visualization.
- Worked on a capstone project simulating real-world data analysis, where I implemented data preprocessing, exploratory data analysis (EDA), and visualizations to derive insights from large datasets.
- Collaborated with peers in coding exercises and problem-solving sessions, enhancing teamwork and debugging skills.
- Built a strong foundation in Python programming, data handling, and analytical problem-solving to prepare for project assignments in the IT industry.

EDUCATION

Dr. Akhilesh Das Gupta Institute of Technology and Management (GGSIPU) — Completed in Aug 2025
Bachelor of Technology in Computer Science Engineering, Minor in AI & ML — **Percentage: 87.02**

St. Marks Sr. Sec. Public School — Completed in 2020
Senior Secondary (Class XII) — **Percentage: 88.5**

St. Marks Sr. Sec. Public School — Completed in 2018
Secondary (Class X) — **Percentage: 86.5**

PROJECTS

AI-Doc-Assistant (Live: https://ai-doc-assistant-umber.vercel.app/) — Jan 2026 - Feb 2026

- **Tech Stack**: LangChain, OpenAI API, Pinecone, Multer, Node.js, Express.js, React.js, Tailwind, Render
- **Developed AI-Doc-Assistant**, a full stack AI-powered document assistant, enabling users to upload documents and perform semantic search-based question and answers.
- **Leveraged** LangChain for chunking the documents data, used OpenAI API to convert chunks into vector embeddings, and stored them to Pinecone Index, hence implemented Retrieval-Augmented Generation (RAG) pipeline.
- **Designed a Chat-based UI** in React, where users can query uploaded documents, and receive structured AI-generated answers.

NetflixGemini (Live: https://netflix-gemini-psi.vercel.app/) — Sept 2024 - Oct 2024

- **Tech Stack**: React.js, Redux, Firebase Auth, Tailwind CSS, TMDB APIs, Gemini 1.5 flash API
- **Developed a Netflix Clone app** using React.js, integrating TMDB APIs to deliver a catalog of 10000+ movies and TV shows.
- **Implemented Google Firebase** for secure and reliable user authentication and managing data using multiple collections.
- **Enhanced user experience** by adding features to save movies to a "Watch Later" list and track liked movies.
- **Utilized Gemini 1.5 flash APIs** for movie and TV show recommendations.

CERTIFICATIONS

- The Complete Web Developer Course 2.0 by Rob Percival (Udemy) – Jan 2023
- DSA in C++ (Coding Blocks) – Aug 2023
- Namaste React (Namaste Dev by Akshay Saini) – Jun 2024
- Namaste Node (Namaste Dev by Akshay Saini) – Sept 2024
- 400+ Leetcode problems - Leetcode

POSITIONS OF RESPONSIBILITY

Swaranjali Music Society – PR Head

- Managed digital marketing campaigns for music events, including email, direct messaging, and social media, over 2 years.
- Raised sponsorship worth more than INR 15000 for the event.
