## PROJECTS

### **BiteXpress**

July 2024

Live : <https://bite-xpress.vercel.app/>

Github : <https://github.com/TusharRajput07/BiteXpress>

**React.js | Redux | Parcel | Swiggy APIs**

- developed BiteXpress, an online food ordering platform that enables users to discover local restaurants, seamlessly add items to their cart, and review a comprehensive billing summary on the dedicated Cart page.
- leveraged Swiggy APIs to dynamically fetch and present restaurant and menu data, ensuring real-time accuracy and relevance.
- utilized Redux for robust state management, and implemented bundling techniques using Parcel, optimizing application performance and load times.
- crafted a fully responsive design using CSS, delivering an optimized and consistent user experience across a wide range of devices.

### **NetflixGemini**

Sept 2024

Live : <https://netflix-gemini-eight.vercel.app/>

Github : <https://github.com/TusharRajput07/Netflix-GPT>

**React.js | Firebase Auth | Redux | Tailwind CSS | TMDB APIs | openAI APIs**

- developed a Netflix clone app using React.js, seamlessly integrating TMDB APIs to provide a rich catalog of movies and TV shows.
- implemented Google Firebase to ensure secure and reliable user authentication and authorization.
- enhanced user experience by adding features such as the ability to save movies to a watch later list and track liked movies.
- used Gemini APIs for movies and TV shows recommendations.
- developed features such as search functionality, and responsive design using Tailwind CSS.
